Leveraging Hospitality Capabilities To Enhance Real Estate Value

Real Estate Value

Hospitality Management Income

Ascott’s Value Add:

Development stage
• Product quality through design
• Cost discipline

Operations stage
• Branding, Marketing & Sales to achieve higher revenue
• Efficient operations to ensure higher margins

Divestment stage
• Stronger cash flow = higher real estate value = higher divestment gains
Key Focus

1. Continue to seek real estate investment opportunities in key gateway cities

2. Grow hospitality management income
   - Strengthen hospitality foundation
   - Achieve economies of scale
### Serviced Residences – An Attractive Asset Class

<td>Short-term accommodation</td>

<tr>

</tr>
</tbody>
</table>

#### Seasonality
- Dependent on general property sector conditions
- **Some seasonality** of hospitality industry, though longer lease terms provide certain level of rental support
- **Seasonal** nature of hotel industry
- Highly correlated with the tourism industry

#### Range of Services
- No service provided
- **Limited services provided**
- Role and involvement of property manager less intensive compared to hotels
- Full range of hospitality service
- Role and involvement of property manager most intensive

#### Cost Structure
- Minimal staff cost and low maintenance costs
- **Less intensive staffing** requirements as only limited services are provided
- **Lower maintenance costs** as average length of stay is longer
- **More intensive staffing** requirements due to need to cater complete range of services
- **High maintenance** due to significant wear and tear

#### Cost of Investment
- Low cost of investment
- **Higher yield** as cost of investment is lower than hotels. The property is mainly a residential development with no need for as many lift calls as hotel and no lavish fitout for large lobby areas and F&B outlets.
- **High cost of investment** with the need to cater to high human traffic as customers are mainly transient.
